

***M-4 is the new CO₂ simulating fogger,
newly designed structure allows to be rigged in any direction.***

The mechanical design of M-4 is simply perfect for transporting as the fluid tank is kept in the separate compartment inside the machine.

Built-in wireless DMX make it complete wire free to save the hassle of cables. With the update auto sensing frequency enables the machine to automatically adjust its frequency to give best performance.

Features

1. Built-in Wireless DMX
2. New structure design for multiple angle rigging
3. Auto sense frequency
4. Fluid tank compartment for ease of transportation
5. Solid sturdy structure of machine body convenient for transportation
6. Huge output volume
7. Great fit for any renting purposes

Specification

- » Voltage : AC-120V, 60Hz
- » Breaker : 15A/250V
- » Power Consumption : 1,500W
- » Output : Height 5 Meters, Width 1 Meter
- » Initial Heat-Up Time : 5 mins
- » Fluid Consumption Rate : 150 ml/ min
- » Tank Capacity : 2.4 liters

- » Control Options : On-board Control Panel
W-1 Wireless Remote ,DMX , W-DMX
- » Weight : 11 Kg
- » Dimensions (mm) : L 345 W 193 H385.7
- » Liquid Used : Antari FLC water-based Fluid
